The Company sustained only one death loss attributable directly to the awful disaster of April 18th last.

The Company's San Francisco Home Office Building, destroyed by fire, was fully covered by insurance in standard companies.

The land upon which the San Francisco Home Office Building stood has not depreciated in value, but by reason of the destruction of Chinatown, hits rather appreciated in value.

San Francisco mortgages held by the Company, amounting to \$298,450, were protected by real estate valued at \$493,000, with improvements, only a part of which were destroyed, worth \$170,000, and upon which improvements the Company held fire insurance to the amount of \$75,000.

The vaults withstood the fire and their entire contents, about two carloads of books and records, are now in our Los Angeles Home Office.

The Company has approved assets of about \$11,000,000; has nearly \$100,000,000 of insurance in force; has an annual income of more than \$4,500,000, and has surplus to policy-holders of about \$1,000,000.

Under the California insurance laws the stockholders, whose wealth is estimated about \$40,000,000, are liable for the obligations of the Company.

HEAT vs. COST

If you will consider the cost of the wood alcohol you use in your chafing dish lamp and compare it with the expense of cooking on a gas stove you will take to the latter at the expense of throwing away the chafing dish. Gas will heat your cooking utensil in chorter time and for less money than any other fuel. It is the most economical and closmest for every purpose. If you doubt this we will give you a hot plate with two burners to aid in convincing you that we are right.
